

R3 v4 — Social Demo Script (60 sec)

Target: TikTok / Instagram / YouTube Shorts

Vibe: Fast, crisp, AI-native energy. Show the polish.

SCENE 1: Cold Open (0-3 sec)

Visual: R3 logo or header with "R3 v4" branding

Audio: Subtle acid-techno beat starter (2-3 sec fade in)

Text overlay: "AI-native browser DAW"

SCENE 2: Login → Instrument (3-8 sec)

Action:

1. Show auth page (clean design, new headers visible)
2. Quick login flow
3. Land on `/instrument` page

Caption: "Cloud-based. Zero setup."

Why: Establishes "in the browser, instant access"

SCENE 3: Load a Sample (8-15 sec)

Action:

1. Drag-and-drop an audio sample into the timeline
2. Waveform loads visually
3. Show the cleaned-up header controls (BPM, metronome, theme selector)

Caption: "One click. Your track is loaded."

Why: Shows the polished header UI + ease of use

SCENE 4: Record → Edit (15-30 sec)

Action:

1. Hit record on an instrument track (or play pre-recorded)
2. Waveform appears in real-time
3. Show the mixer view with 2-3 tracks
4. Quick EQ/gain adjustment on one track

Caption: "Multi-track mixing. Real-time feedback."

Audio: Acid-techno beat now full intensity

SCENE 5: AI Mixing (30-45 sec) ← THE HERO MOMENT

Action:

1. Open the "Mix Suggestions" or "AI Level Assist" panel
2. Show confidence meter (0.65+) or suggestion badge
3. AI applies an auto-level suggestion → waveform adjusts visually
4. Show the ghost knob / suggestion overlay
5. User accepts it with one click

Caption: "AI levels your mix. In milliseconds."

Why: This is the LLPTE moat — show it working

SCENE 6: Final Mix → Export (45-60 sec)

Action:

1. Show all 3 tracks balanced
2. Hit play — full stereo mix plays
3. Hit "Save" or "Export"
4. Toast notification: "Session saved"

Caption: "Professional. Effortless."

Outro text: "R3 v4 — AI mixing for everyone"

TECHNICAL NOTES

Header Polish Highlights (shown in Scenes 2-4):

- ✨ Clean nav bar (page-nav.tsx polish)

- ✨ BPM readout in JetBrains Mono
- ✨ Theme selector visible
- ✨ Metronome toggle responsive
- ✨ Logout button positioned right
- ✨ No visual clutter — acid-green accents pop

Color Palette On Display:

- **Black backgrounds** — clean, focus on the waveforms
- **Acid green (#a3e635)** — active buttons, AI suggestions, accents
- **Cyan** — playhead, transport indicators
- **White text** — sharp, readable at any speed

Pacing:

- **0-15 sec:** Setup (auth + load sample) — slow, establish context
- **15-45 sec:** Production (mix + AI) — medium, show workflow
- **45-60 sec:** Results (export) — fast, climax

Audio:

- Subtle acid-techno beat (Spotify/Epidemic Sound / royalty-free)
- Fade in at 3 sec, full intensity at 15 sec
- Slight dip during voiceover (if adding captions via text overlay)

RECORDING CHECKLIST

- ☐ Browser window: **full-screen, 1920×1080 minimum**
- ☐ Browser zoom: **100%** (no scaling artifacts)
- ☐ Theme: **dark mode** (shows off the acid-green accents)
- ☐ Network: **stable** (no lag on animations/hover states)
- ☐ Audio: **clean** — record system audio + any voiceover separately
- ☐ FPS: **60fps** (smooth, professional feel)

Tools:

- **Mac:** QuickTime or ScreenFlow
- **Windows:** OBS Studio (free, professional)
- **Web:** Loom (simple, cloud-friendly)

POST-PRODUCTION

1. **Cut to 60 sec** (YouTube Shorts, TikTok, Reels all support 15–60 sec)
2. **Add captions** (no sound needed — accessibility + autoplay mute)
3. **Color grade** (slight lift on blacks, boost acid green saturation +10%)
4. **Music:**
 - Epidemic Sound or Artlist: search "acid house" / "electro" (royalty-free)
 - Or use existing R3 v4 audio branding if you have it
5. **Text overlays:**
 - Scene 1: "R3 v4 — AI-native browser DAW"
 - Scene 2: "Cloud-based. Zero setup."
 - Scene 3: "One click. Your track is loaded."
 - Scene 4: "Multi-track mixing. Real-time feedback."
 - Scene 5: "AI levels your mix. In milliseconds." ← **HERO MOMENT**
 - Scene 6: "Professional. Effortless."
 - Outro: "R3 v4 — AI mixing for everyone"

POSTING STRATEGY

Platforms:

- TikTok / Instagram Reels: 60 sec (1080×1920 vertical or 1080×1080 square)
- YouTube Shorts: 60 sec (1080×1920)
- Twitter/X: 60 sec (16:9 or square)

Hashtags: #R3v4 #DAW #AudioProduction #AI #MusicProduction #TechDemo #BrowserDAW #MixingAI #Beatmaking

Posting time: Early morning or evening (when creators/musicians are online)

OPTIONAL: Extended Cut (2–3 min for LinkedIn/YouTube)

If you want to go longer for LinkedIn or a full YouTube video:

- Add narration (calm, professional voice)
- Deeper dive into each scene

- Testimonial or use-case scenarios
- Link to pricing / beta signup

But **start with the 60-sec social cut** — ship it fast, gather feedback, iterate.
